Work Experience

1. **Lead Developer** (3 yrs)— *NNK (Web & Graphic Solutions Startup)*

   - Developed custom content management systems (CMS) for clients, focusing on managing pages, images, and web content
   - Worked with Flash (since its Macromedia days), Adobe Dreamweaver, and built web and intranet solutions for clients
   - Specialized in both graphics and web solutions, handling the integration of both

2. **Full Stack Developer** (1 yr)— *DPS Telecom*

   - Developed custom intranet applications using PHP
   - Created software to analyze HTTP access files for keyword tracking, improving web traffic insights
   - Built and maintained in-house systems for company use, both on-site and through kiosks
   - RESTful Endpoint Development

3. **Network Administrator** (2 yrs)— *Hays RPC Inc*

   - Built, installed, maintained, and supported Citrix, Quicken, Blackberry Server, Microsoft Server 2000, Active Directory, Veritas Backup Server, MS Exchange Server, and IIS Web Server
   - Developed in-house .NET solutions for farming logistics, including tools to manage and track products
   - Supported a 200+ user WAN and led the installation of Microsoft Server 2000 Network
   - Designed and implemented backup solutions using Veritas Backup Server

4. **Computer Technician** (2 yrs)— *Aroma Computers*

   - Built custom PCs from scratch for clients based on selected parts and specifications
   - Troubleshot Windows environments and hardware issues, managed and optimized system performance
   - Installed and maintained RAID arrays and network hardware, and handled subnetting and crimping CAT-5 cables

5. **Y2K Analyst** (.5 yrs)— *Community Hospital (via temp agency)*

   - Loaded Y2K patches for all computers connected to the hospital's network, on-site and off-site
   - Learned and supported Novel and Netware IPX/SPX and NetBEUI protocols
   - Supported Netware clients on Windows Server

   D-Link Customer Support Rep (*2 yrs*)— *Alorica Call Center*

   - Assisted customers with networking products over the phone, including routers, WiFi adapters, and IP cameras
   - Provided troubleshooting for Windows and Mac systems
